

## CSI GROUP: THE ONE-SOURCE KITTING SOLUTION

### MANUFACTURING CYCLE

**CSI GROUP  
PERFORMS  
THESE  
FUNCTIONS**

With the CSI Group managing your kitting requirements, you can eliminate the multiple steps involved with procurement and storage of parts in your stockroom and all of the necessary inspections that go along with it. Kits are assembled and inventoried in CSI's modern and efficient warehouse. Kits arrive complete, spec-specific, and on time to your manufacturing facility, ready for assembly and movement to production.

### SOLUTIONS

CSI offers a solution to common kitting problems like incomplete or late deliveries, production disruption, stockroom inefficiencies, and cash flow, in invoicing, and accounting backlogs. We provide additional lean practices in various processes and departments.

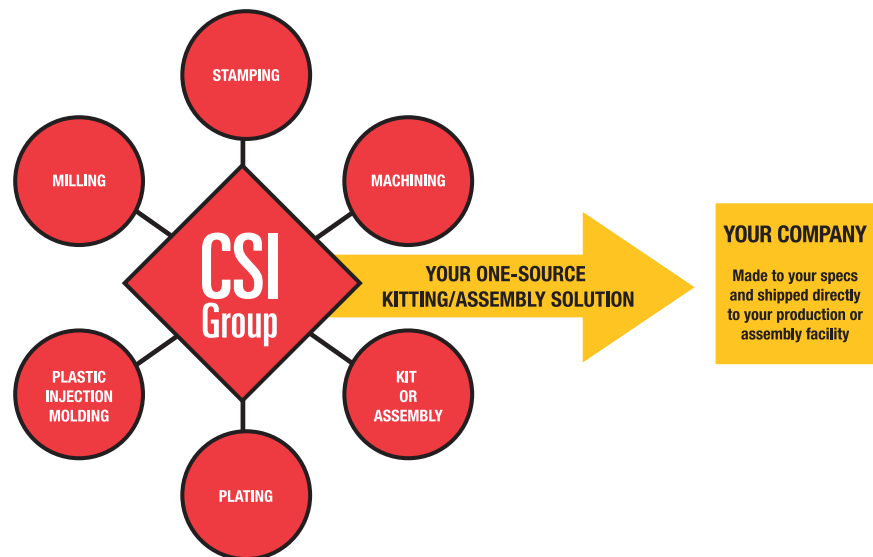

- CSI delivers complete kits on time, eliminating delivery and production delays, keeping your inventory together and production on schedule
- Inventory efficiencies improve—CSI will inventory your kits, keeping stock stores accurate, uncluttered, and in order
- Procurement processes stay on track—CSI only ships complete kits
- Place one PO rather than multiple POs—as your one-source kitting solution, CSI supplies you with all the components you need at one time
- Maintain the integrity of your kits—no need to rob one kit to complete another—kits arrive intact
- CSI provides 100% on-time delivery to assembly, taking guesswork out of forecasting and production cycles
- Eliminate incoming quality inspection—all vetting and inspection is done before kits leave CSI
- Reduce your supplier base and increase productivity — remove extra steps and processes that slow you down
- Save time, money, and resources on shipping—CSI ships direct to your assembly or manufacturing site
- Improve cash flow—know what you need, when you need it, and receive it as ordered

*“CSI’s kitting program provides us with dramatic cost savings. We were able to reduce purchase order requirements, reducing vendors from seven to one. Material savings alone are probably 12%-15%. With CSI we were also able to increase efficiencies in quality control and inventory management, where CSI provides us with 100% quality and 100% on-time delivery.”*

– Chris Demko, Purchasing Manager

## CSI GROUP IS YOUR ONE-SOURCE FOR KITTING AND ASSEMBLY SOLUTIONS AND ALL OF YOUR PRECISION COMPONENTS

A Unique Business Model in the Mechanical Component Industry

## CSI ONE-SOURCE KITTING PROGRAM BENEFITS

### Streamlined Ordering and Delivery

When you enroll into CSI's One-Source Kitting Program, you'll enjoy the benefits of streamlined ordering and delivery with reduced lead times. CSI builds up their in-house inventories of your components, so your stock is available and ready to ship with quick turnaround time. You make one order to CSI and they handle all the procurement and component manufacturing, so you don't have to.

### Intelligent Process Adaptive Control Technology (iPACT)

CSI tracks parts from first-piece inspection and throughout the production cycle using Micronite Data process control software, so you know your components are created to top-quality specifications. This real-time data reveals how the part is running and gives dimension readings and analysis, providing immediate feedback on any changes that need to be made during production, ensuring calibrations remain to exact specs throughout the production cycle.

### Certifications

Transparency and accountability are important to CSI and you. For any secondary processes your parts require—plating, heat treating, passivation—we provide the proper certification.

## THE BEST PROGRAM FOR YOU

With our years of experience and valued partners, all leaders in the high-precision component manufacturing segment, we can easily find the one-source solution best suited for you and recommend options for your component and kit needs:

- Cost-savings ideas
- Engineering assessments
- Cost-effective production locations
- Engineering designs
- Sample parts

Contact CSI to find the perfect program for your company. Tell us what you need and we'll work together to provide you the best one-source solution.
